

NeuroACT – terms of use

Annual fee

For continuous use of the method in a clinic or equivalent, an annual license fee of USD 490 is added, which is paid annually unless otherwise specified. The fee covers NeuroACT group treatment or individual treatment sessions based on the NeuroACT material. The fee is intended to ensure the continued development and maintenance of the NeuroACT program and the digital platform.

License

The clinic or equivalent pays the license fee using the method unless otherwise specified. The license is thus not linked to an individual therapist. Several therapists at a clinic can therefore use the same license. In addition, the license allows using the method in the format that suits the clinic or the equivalent best.

Included in the license

The license includes a digital platform that provides the complete NeuroACT treatment manual, including all working material.

Included in the license are:

- The complete NeuroACT treatment manual including updates
- Adapted written work material (info sheets, worksheets, homework sheets, illustrated metaphors, PowerPoint presentations)
- Adapted audio-delivered mindfulness and acceptance exercises
- Videos clarifying ACT techniques
- Interview templates for the inclusion of participants
- Reliable and valid rating instruments for evaluation
- Scientific articles, presentations, and lecture material on the method
- A digital platform for 24/7 access to the material
- NeuroACT certificate
- Membership in Brainproof's professional community
- Technical support
- Expert consultation whenever needed

Exception

Individual clinicians, such as therapists with their clinics, smaller private clinics, and others who intend to use the training and material to orientate their professional work, are excluded from paying the license fee.
